

Supply Chain Management

Supply chain is always the long term partner of Nafco. Except for the required conditions of supply chain, such as more competitive quality, technology, OTD and cost, Nafco emphasize our supply chain on governance, environment, and society. We invite our supply chain for the sustainable development. We believe the good supply chain management is based on the close cooperation to improve the customer' s satisfaction and the experience of the best products and also the best service. Nafco is working on the sustainable development not only for ourselves but also with our supply chain for a better Corporate Social Responsibility.

Suppliers Sustainable Management

Nafco follows the specification of sustainable development, we required our suppliers to provide quality system certification, Declaration of Non-use Conflict Minerals, Hazardous Substance Management.

Restriction and Prohibition of Hazardous Substances

- Non-use Conflict Minerals
- No counterfeit is allowed.
- Non-disclosure agreement
- No bribery, venality, kickback, unsuitable entertainment
- Maintain occupation health and safety
- Follow the regulation of environment protection in discharge of pollutant and waste disposal

Nafco evaluate our suppliers annually and rating by the risk. And the evaluation of 2021 has been completed.
